Since the outbreak of the COVID-19 virus and the subsequent lockdown measures enforced by national governments to contain its spread, the sport habits of European citizens have been severely disrupted. As European countries face different situations, measures regarding sport facilities, professional sport events and outdoor exercise vary across countries.

With exercise remaining key to maintaining good health, ESSNA has put together a table of the different public health measures restricting sport activities across EU Member States and the United Kingdom. ESSNA encourages all sportspeople to exercise responsibly, practice caution and respect social distancing rules.

For more information on how to exercise and use sports nutrition safely, please read our [beginner's guide to sports nutrition](#), our [10 steps to buying the best protein](#), and our guide on [pre, during and post exercise sports nutrition](#).

This document was last updated on **12 October 2021**, and will be reviewed on a monthly basis. As European countries continue to generally lift public health restrictions, please note that this is an overview. We encourage you to check local rules before making any decisions.

Country	Gyms and sport facilities	Outdoor exercise	Professional sport events
Austria	<p>Open</p> <p>Only available to citizens with a 'COVID certificate'.</p>	<p>Allowed</p> <p>Mandatory testing or vaccination requirement for group sports.</p>	<p>Restrictions in place</p> <p>Different capacity restrictions in place, negative COVID-19 test or vaccination proof may be required.</p>

Sweden	Open	Allowed	Allowed
United Kingdom	Open	Allowed	Allowed Negative COVID-19 test or proof of vaccination may be required.

Throughout the COVID-19 pandemic, ESSNA has engaged and supported European institutions, agencies, and national governments in ensuring that concrete actions are taken to assist the sports nutrition sector in overcoming the hurdles of public health lockdowns in the EU27 and the UK.

In particular, ESSNA is calling on European institutions, governments and their agencies to:

- Ensure that the health and safety of citizens are a top priority for governments and support all initiatives related to promoting regular physical activity combined with healthy and balanced diets.
- Consider compensation measures for the sports sector, following gym closures, cancellation of major sporting events and related consequences of the COVID-19 outbreak and its containment measures. This is while acknowledging the role played by the sports nutrition sector in reaching out to citizens and supporting their health.
- Ensure that the European Commission's scientific bodies provide high-quality scientific advice on how to successfully resume safe training for athletes and the general public outdoors and in gyms as part of a wider strategy to exit the crisis.

To support the sector in recovering from the impact of COVID-19, ESSNA is now an observer in the European Commission's new expert group on the recovery and resilience of the sports sector. On 14th June 2021, ESSNA joined the first meeting of the Expert Group and shared its views on the impact of COVID-19 on the sports nutrition sector and raised awareness about the main challenges faced by the industry, such as a decline in the sales of sports nutrition products and the decrease in numbers of people exercising. ESSNA also emphasised that any way forward needs to be ambitious and science-based. A new meeting is planned for Autumn 2021, where discussions on the exit strategy will continue.
